To Our Customers

WE NOW number among our customers more than one-third of all the families in the United States, supplying a large majority of these families with practically everything they eat, wear or use—everything needed for personal use, for the home, the farm, the office or the factory. In buying from us these families are saving about fifteen million dollars annually, and this tremendous saving is matched by an equal advantage in quality, for it is the fundamental law of our business that quality must never be sacrificed to reduce price. We have the most highly perfected methods of buying, making and marketing ever devised by any business institution. We insure highest quality and lowest price by our perfect control of the source of supply, reaching back to the raw material in many lines, supplying carefully selected materials to carefully selected factories either owned or controlled by us, watching every step in the making through the eyes of our own trained experts; putting into the goods every possible improvement

in quality, taking out of the goods every item of unnecessary cost.

We have adopted every idea, every device, every method of proved value in order that our patrons may enjoy the best possible service. We endeavor to give service that is even better than you might reasonably demand. Fair criticism of our service, our goods and our business methods is sincerely invited. In fact, we are largely dependent upon such criticism for the correction of errors and the improvement of our methods. When we receive criticism or complaint we not only adjust the difficulty specified, but we investigate the cause of the complaint and we take such steps as will make a repetition of the same trouble unlikely. Our customers rightly expect the best goods, the best service, the best treatment; we desire to give you all these and more. We have endeavored to make the above statement so clear that our customers will fully understand our purposes and will feel free to bring any faults to our attention and be assured of prompt and satisfactory action.

Our Terms and Liberal Guarantee

Send us your order, enclose our price in the form of an express or postoffice money order, a bank draft, the currency in a registered letter, or your personal check, and we will finish and ship you the goods, guaranteeing their arrival in perfect condition. We guarantee that each and every article in this catalog is exactly as described and illustrated; that any article purchased from us will satisfy you perfectly; that it will give the service you have a right to expect; that it represents full value for the price you pay.

If for any reason whatever you are dissatisfied with any article purchased from us, we expect you to notify us in order that we may tell you how to return it, and then return it to us at our expense. We will then exchange it for exactly what you want, or will return your money, including any transportation charges you have paid.

This guarantee insures you against any possible disappointment in dealing with us.

Granite and Marble Monuments, Tombstones and Grave Markers

RICH or poor, you cannot afford to pay the high prices charged for memorials in granite and marble under the old time method of unnecessary expense and long profits added to the actual cost of the raw material and labor before the monument, tombstone or marker reaches your cemetery.

Long profits to the wholesale dealer are necessary to his extra expenses and long time credits extended to the retail dealer; the long profits of the retail dealer are necessary to his method of selling the finished work to you by the use of the commissioned salesmen, and the long profits of the commission agent are necessary to his very existence, because he must make from one week's to one month's salary out of one sale, all of which you pay in the price charged you when you buy a monument, tombstone or marker by the old fashioned method.

Quarry to cemetery is our enterprising, up to date method of furnishing you the highest grade of Best Barre Granite, the highest grade of White Clouded Rutland Italian Marble, and the highest quality of Acme Blue Dark Vein Marble, at the actual cost to quarry the stone, carve, polish and letter it, adding only our one conscientious margin of profit, delivering them on board the cars at the quarry in Vermont, at such "live and let live" prices that we place them within the reach of rich and poor alike, enabling any and all to honor the graves of their dead within their means.

We do all this and more. We guarantee each and every piece of granite and marble to be the highest of high quality, the workmanship to be the finest and best products from the hands of the highest skilled granite and marble craftsmen. We guarantee the shipment to reach you in perfect condition, ready to set up in the cemetery, lettered exactly as you have instructed us, or your money will be returned to you, together with any freight charges you may have paid.

A memorial in granite or marble is a purchase you make perhaps but once in a lifetime, and the average citizen is not inclined to question the price asked him after he is shown a design that pleases him.

Intrinsic value of the stone and workmanship may be unknown to you, and you pay the enormous figure asked on account of the intermediate expenses and long profits that have already been added to the first cost of the material.

Since you do not know what it costs to quarry, what it costs to shape, carve, polish, finish and letter the tombstone or monument, you are at the mercy of a few combined interests or the traveling commission agent of some distant monument company.

At our wonderfully low prices you have the assurance and guarantee that each and every monument, tombstone or marker offered by us must please you in every particular when it reaches your home station, must be exactly as illustrated and described in this catalog, must be the best value you ever saw at anything like the price, or you have only the small task of notifying us to return your money and write you how to dispose of the shipment.

Such a daring offer, such a willingness to risk a total loss, such a liberal proposition for the protection of the purchaser of granite and marble memorials was never heard of until established and maintained by us.

Don't forget this would mean a total loss of the cost of all the material, the cost of all the skilled workmanship of shaping, carving, polishing, finishing and lettering, including the cost of the freight for transporting it to your home station. Whether you live in the New England States or on the Pacific Coast, we do not hesitate to make this daring offer, because our years of experience have shown us that each and every one of our customers for memorials in granite and marble have been glad to write us a testimonial that the material, workmanship, beauty of finish and everything in connection with each shipment has been all and more than we claim for it in the pages of this catalog.

Best Barre Granite is only obtainable from the best quarry in the Barre Mountains of Vermont, and all substitutes from nearby quarries in the broad area of territory sometimes known as the Vermont district, are of less value, being from recently opened quarries whose depths have not yet been opened up to the rich strata lying far below. Best Barre Granite comes from the oldest and earliest worked quarries now operating far below the less perfect surface material. We handle Best Barre Granite, and none other.

Our Dark Vein and White Clouded Rutland Italian Marble is to be obtained only from the best developed strata in the veins of the Rutland district in Vermont. It stands first and foremost among all marbles for its close texture, its hardness and durability under years of exposure to the elements in the cemeteries throughout the country. Both Acme Blue Dark Vein Marble and our White Clouded Rutland Italian Marble are too well known throughout the world for us to praise their quality. They are well known to be harder and to stand the weather exposure better than imported Italian marble, which is best used for interior work and statuary purposes.

Finishing our granite and marble memorials in large numbers, by the most economical methods, subject to none of the expenses incident to the old fashioned, high priced and long profit methods, it is no wonder you will be asked \$100.00 for a monument, where our price will be less than \$60.00; or \$30.00 to \$50.00 for a tombstone and marker, where our price will be about \$20.00 to \$30.00, and the wonderful difference in these prices, even after you have paid the freight to your home station, makes it your duty to yourself, your family and your friends to entrust your order for a monument, a tombstone or a marker to us under our unlimited, binding guarantee that the material and workmanship will be of the best, that the shipment shall reach your home station free from mar, scratch or injury in transportation, that the value shall be greater than anything you ever saw before at anything like the price, or your money will be returned to you.

We handle tons of granite and marble, where others buy pounds, and we give you the full benefit of a low cost to quarry, adding only the wages of the skilled workers who shape, polish, engrave and letter, and our one conscientious profit.

Only the highest paid skilled artisans are employed, men whose lives have been devoted to this class of work, fitting them for turning out a product superior in every respect.

Rigid inspection is given to every piece of granite and marble entering into these wonderful values in grand monuments, dignified tombstones and beautiful markers, both before the cutting of the block to size, after the block is squared, and step by step and day by day as the work proceeds, the eye of the inspector is ever on the piece of stone, that neither blemish nor flaw detrimental to its appearance or its lasting qualities is overlooked. When such is found, it is thrown aside, the bad spot cut away, and the remaining perfect part used for a smaller tombstone or marker.

Utmost precaution under the sharp eyes of these highly trained inspectors assures our customers that they will receive a class of cemetery work such as is seldom, if ever, found in the stock of any retail dealer.

Make your selection from the pages of this catalog, and send us your order for the smallest marker, the handsomest tombstone or the biggest monument shown in these pages, and we guarantee to take all the risk of making it to order for you, carving it, polishing it, finishing it exactly as described and illustrated, lettering it exactly as you instruct us, boxing it carefully and shipping it to your home station, taking all the additional risk of the freight charges and the total loss of our entire investment if it does not prove to be all and more than we claim for it, the greatest value you ever saw at anything like the price. Could there be anything more convincing?

Do not delay your order and then expect it in time for any given date, such as Memorial Day, without taking into consideration the time required to finish, letter and ship, carefully given underneath the prices of each size and design. In addition to the time required for executing the work, lettering and shipping it, do not forget to allow ample time for a freight shipment to reach you from the state of Vermont, feeling assured that when it arrives you will be glad to send us a testimonial of the appreciation of yourself, your family and your friends of its astonishing value and beauty.

ABOUT THE FREIGHT

While the wonderfully low prices quoted in this catalog are for cemetery work safely boxed and delivered on the cars in Vermont, and the freight must be paid by you, yet you will find the freight charges will amount to next to nothing compared to what you will save in price, even after you have paid the freight to your home station. If you live in the West, our Vermont quarry and works may seem a long distance away, but remember the freight is low on finished granite and marble and do not let the distance deter you from ordering. The weights are carefully given opposite each price, estimated as closely as it is possible without weighing each and every shipment separately

after it is boxed, and on page 108 we give the railroad freight rates to a few points in your state. To points east of the Mississippi River, north of the line of the Ohio River, the freight averages only 25 cents to 62 cents per 100 pounds, according to the distance from Vermont. West of the Mississippi River and east of the Rocky Mountains, averages only 48 cents to \$2.00 per 100 pounds. From this you will observe the freight on our No. 61D5320, illustrated and quoted on page 21 at \$3.60, weighing 150 pounds, will only amount to 40 cents to 93 cents east of the Mississippi River and north of the Ohio River, and 62 cents to \$3.00 between the Mississippi River and the Rocky Mountains. If you live in the New England States the freight will be very little, on account of the location of the quarry and works in Vermont. Send us your order, and we know we can furnish you with a tombstone or monument at a price, even with freight added, that you cannot possibly duplicate in your home district. We know that we can save you at least one-half on your purchase, and furnish you a finer and better finished monument than you can obtain anywhere else at anything like the price.

WE DO ALL THE LETTERING FOR YOU. The tombstone reaches you complete, all ready to set up in the cemetery.

INSCRIPTIONS ON GRANITE

The wonderful hardness of Best Barre Granite makes all tool cutting slow and difficult, but the following prices for lettering are within the reach of all: Ordinary V sunk letters, length, 1 inch or under, 10 cents each; 1½ inches or under, 12 cents each. Where raised letters are desired, the prices will be for letters 1½ inches or under, raised ⅛ inch, 45 cents each; 2½-inch letters raised ¼ inch, 60 cents each; 4-inch letters raised ⅜ inch, \$1.35 each. Do not confuse the prices of lettering on granite with the prices of lettering on marble. For prices on other sizes of granite letters see page 73. Inscriptions on marble quoted on page 19.

INSCRIPTIONS ON MARBLE

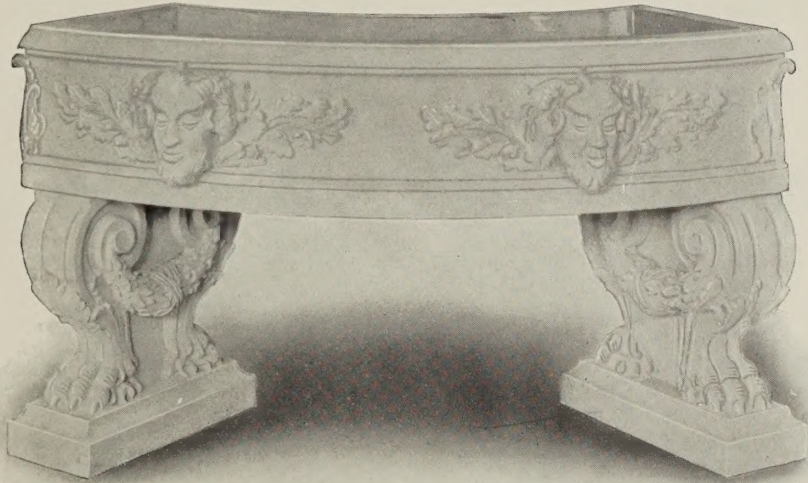

For plain V sunk inscription letters, 1½ inches and under, suitable for the name and dates of birth and death, we charge 6 cents per letter on all marble markers, marble tombstones and marble monuments, illustrated on pages 20 to 67, and small V sunk verse letters, 2½ cents per letter, when left entirely to our artist, who lays out the work to the best advantage on the space or spaces shown on the design you select. When raised letters are desired for those in lengths of 1½ inches or under and raised ⅛ inch in panel, we charge 15 cents per letter, and larger sizes in proportion. See page 19 for prices of larger sized letters on marble. Do not confuse these prices for marble inscriptions with lettering on granite. See page 73 for prices on granite letters. If German, Old English, gilded, or other fancy letters are desired, the prices will be double those we quote, whether in granite or marble inscriptions. When sending your order, be sure to write the inscription very plainly, so there will be no delay or mistakes, and we will send you a typewritten confirmation of the inscription that you may see that we have it exactly correct, at the same time we are making the monument, tombstone or marker to order, ready for lettering while you are signing and returning to us the typewritten confirmation of the inscription.

The Age of Concrete

Artificial composite stone or concrete has become a fixed commodity in this age of improvement, and while the crushed stone used decides its color according to the district from which it is obtained, yet the whiteness so much desired can only be obtained from a limited number of districts, where the whiter crushed stone may be obtained. While pure white is not obtainable anywhere, the lightest known is to be found in our artificial composite stone flower box and garden seats illustrated on this page.

Hercules Wrought Steel Ornamental Fence

THE home beautiful is never so complete, never so attractive as when the approach is ornamented with our beautiful Hercules Wrought Steel Fence. Compared with the added dignity and beauty which this artistic yard enclosure brings to your home, the extra cost is a mere trifle. You are no doubt proud of your home, proud of your lawn with its flowers and shrubbery; then why not make the picture complete and pleasing to the eyes of not only yourself and family, but pleasing to your neighbors as well, by improving with the best fence obtainable—Hercules Wrought Steel Indestructible Fence? A glance at the illustration on opposite page will give you a fair idea of how your own home would look as improved with our attractive and durable Hercules Wrought Steel Fence.

Fifty-one cents to 70 cents per running foot is the price at which we furnish Hercules Wrought Steel Fence in heights from 30 inches to 48 inches, according to the more complete specifications given in the following paragraphs. The price we quote on this fence is so much lower than what is usually asked for wrought steel fence of this character that you will need to read the description thoroughly to fully realize the tremendous saving we can make you.

The rigid construction of our Hercules Wrought Steel Fence is worthy of particular mention. Honest materials, honestly put together and designed by men who have made a lifelong study of good fence requirements—that is why our Hercules fence, once carefully erected, is good for more than a lifetime of wear and brings a feeling of pride and satisfaction always.

The wrought steel pickets used in the construction of Hercules fence are 25 per cent stronger than those made of iron and represented by some dealers as steel. Our experience proves that 7-16-inch wrought steel pickets, spaced 4 inches apart, and 3 inches from the ground, have plenty of strength without appearing clumsy, and we use them on all sizes of Hercules fence except the 48-inch, on which we use ½-inch pickets.

The steel channel rails, 1¼x½-inch, which are used in the construction of Hercules fence, as against angle rails used by some manufacturers, are like two to one in point of strength, channel rail having practically double the strength of angle rail, beside giving the fence a finished appearance from the inside, which is not found where angle rails are used. The pickets are set in the channel rail by a specially designed machine, making practically a one-piece construction which prevents the pickets from ever becoming loose, as they often do in some makes of fence.

The malleable iron ornaments we use are much stronger and less liable to break than cast iron ornaments commonly used for this purpose. Every ornament is solidly riveted to prevent its becoming loose or falling off.

Steel bar line posts. All line posts are included in the per foot price of the fence, and are made of solid steel bar with heavy angle iron plate for anchor, braced by angle iron from anchor to post, a very rigid and durable form of construction. Line posts are placed as near 8 feet apart as the space will permit, and midway between the line posts we place a substantial supporting foot with anchor, which positively prevents sagging.

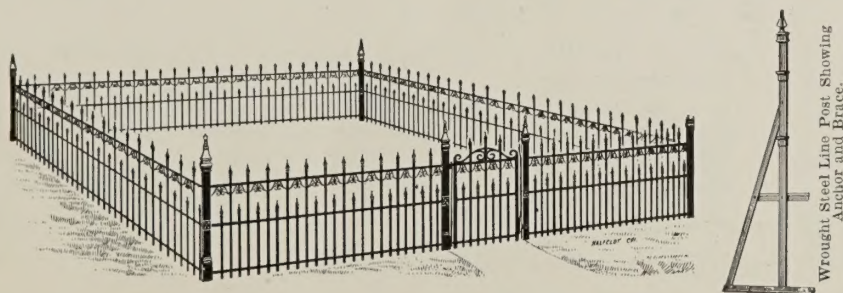

Corner, end and gate posts are made of heavy cast iron, 4 inches square, as shown in illustration, and weigh 75 pounds for the 30-inch and 36-inch, 90 pounds for the 42-inch, and 105 pounds for the 48-inch fence. They are not included in the per foot price quoted. For the 30-inch and 36-inch fence add \$3.00 for each corner, end and gate post needed. For the 42-inch add \$3.50, and for the 48-inch add \$4.00 for each corner, end and gate post needed.

The wrought steel, self closing gates. The manner of construction insures perfect resistance against both use and abuse. Hinges and latch are made of malleable iron and spring steel. These gates will open either way and are self closing. All gates should be measured in with the fence, and then add \$2.50 for each single walk gate 3 feet wide, and \$5.00 for a double driveway gate 9 feet wide, if required. The driveway gates are extra braced to prevent sagging, a very common fault with gates that are not so carefully made.

Hercules Wrought Steel Fence is made of the best materials by the best skilled labor in a modern factory equipped with specially designed machinery for the purpose. Our supervision of the manufacture during every process insures your receiving the very best fence your money could possibly buy, and we assume all the risk because we are absolutely sure that every Hercules Wrought Steel Fence that leaves the factory is as perfect as twentieth century machinery and skilled labor can make it. Let no agent or dealer deceive you as to the quality of our Hercules Wrought Steel Fence. Our guarantee, backed by this, the largest mercantile institution in the world, is a safer guide to follow than any promise made by agents.

Order a Hercules fence now and we will see that it reaches you in perfect condition, painted a beautiful glossy black, ready to erect according to your measurements, and guaranteed to be made from the very best materials, exactly as specified above in every particular. If it does not come up to your expectations in any manner, if you are not perfectly satisfied that you have received a fence better in every way than you expected and better than you could buy anywhere else at the price, if for any reason whatever you are not fully satisfied with the fence when it reaches you, write us that you are holding it subject to our disposal and we will send you shipping directions and return your money to you, including the freight charges expended.

Atlas Wrought Steel Ornamental Fence

FOR service and durability there is no better fence made than Atlas Wrought Steel Fence. The same high standard of construction described in our Hercules fence applies as well to Atlas fence. The lower price is brought about by sacrificing the ornamentation on the under side of the top channel rail and by the use of corner, end and gate posts of fancy openwork design equally rigid and substantial. The illustration on opposite page shows how Atlas Wrought Steel Fence adds to the dignity and beautiful appearance of the home. Picture in your mind how much satisfaction and pride you would derive from seeing this fine fence erected in front of your own property. The same good taste that creates beautiful homes with well kept lawns calls also for an artistic ornamental fence, as much for protection as for mere beauty, and Atlas Wrought Steel Fence answers the call perfectly.

At 40 cents per running foot for the 30-inch and upward, according to height, to 95 cents for the 60-inch fence, you can beautify your property with Atlas Wrought Steel Fence, thus securing a lifetime of fence satisfaction at a reasonable price. You save about 25 per cent at this price, compared with what other dealers ask for fence claimed, but not proven, to be just as good. Read the specifications carefully and you will find that nowhere else can you buy fence of such high standard of quality for anywhere near our price. Atlas Fence comes completely finished and painted a rich glossy black.

The scientific construction of Atlas Wrought Steel Fence is the result of years of study and practice in fence requirements, combined with the carefully carried out plans of the best designers of ornamental fence, and when you have an Atlas fence erected on your grounds you will find you have made a wise investment. You will find many points of superiority if you carefully consider wrought steel fence as compared with cheaply constructed iron fence offered by some manufacturers. Superior material, design and workmanship give a distinction to this fence which marks the difference between mere fence and the perfect Atlas Wrought Steel Fence.

Wrought steel pickets are used in the construction of Atlas fence. They cost more than the iron pickets used by some manufacturers, but experience proves they stand the strain, and we spare no expense to bring our wrought steel fence up to just what the name signifies—wrought steel fence. The price list on opposite page specifies the thickness of steel used for pickets in the various heights of fence. In all sizes of Atlas fence up to and including 48 inches high, the pickets are spaced 4 inches from center to center. The 54-inch and 60-inch fence have the pickets spaced 5 inches from center to center. In all sizes the pickets are set 3 inches from the ground.

Wrought steel channel rails are used in Atlas fence in preference to angle rails. Most manufacturers use angle rails and the casual observer does not notice the difference, but the use of channel rails stiffens the panels and prevents the tendency to sag in the center, which you have no doubt noticed in some iron fences. In the 30-inch fence 1½-inch channel is used; the 36, 42 and 48-inch are made with

1¼x½-inch channel rails, and the 54 and 60-inch have 1½x½-inch rails. Channel rails also give the fence a better appearance from the inside than angle rails.

The ornaments used on pickets, posts and gates are all made of malleable iron, practically unbreakable, and they are all firmly riveted to prevent their becoming loose or falling off. Missing ornaments on posts or pickets mar the beauty of ornamental fence.

Rigidly anchored line posts are one of the features of our wrought steel fence, as you will see by referring to illustration of line post on this page. Line posts are placed as near 8 feet apart as space will permit and each panel has a center support with a good solid anchor which positively prevents sagging.

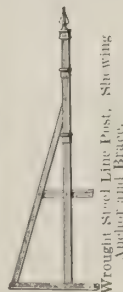

Notice the beautiful posts used for corners, ends and gates with Atlas Wrought Steel Fence. While they are lighter in weight and therefore cheaper than the heavy strong cast iron posts shown in connection with our Hercules fence, they are artistic in design and equally strong for their purpose, and will give the same good service as the heavier post. Corner, end and gate posts are not included in the per foot price, but are charged extra at \$2.00 to \$3.50 each, according to height of fence, as shown in schedule of prices on opposite page.

Wrought steel self closing gates of the same high grade construction as furnished on our higher priced Hercules fence are furnished with Atlas fence, except that not quite so much ornamentation is used. All gates must be measured in with the fence, and then add \$2.50 extra for each single walk gate 3 feet wide, and \$5.00 extra for a double driveway gate 9 feet wide, if required. The driveway gates are solidly braced to prevent sagging.

Atlas Steel Fence is not an expense but a paying investment when you consider how much it will increase the value and attractiveness of your property; an investment that will pay daily dividends of pleasure and protection. In looking over your neighborhood you will see that the finest and most comfortable looking places are those enclosed with an ornamental fence. You have no doubt learned from past experience that it pays to buy the best. That is just why our wrought steel fences are the right fences for you. The original cost may be a little higher than some other style of fence, but because the cost per year of satisfactory service is so small, wrought steel fence appeals directly to the economical buyer.

Make out your order now, giving us a small sketch showing entire length of fence wanted with position of gates plainly marked. Make sure that all your measurements are correct. We guarantee the fence to reach you in perfect condition, ready to erect according to your order, and we guarantee it to please you in every particular. Our guarantee is an insurance protecting you against any disappointment or dissatisfaction. This system of dealing is directly responsible for the steady growth of this institution. Thousands of home owners have learned that our guarantee means a saving of considerable money in the purchase of ornamental fence, and a positive protection against dealers who care more for present profit than for future patronage.

Vulcan Wrought Steel Ornamental Fence

SUBSTANTIAL wrought steel fence at such a low price is another convincing proof that we are continually striving to furnish our customers the best fence at the lowest price. At 32 cents per running foot this 30-inch high wrought steel fence of beautiful design and high grade construction is a remarkable value that has never been equaled by any fence manufacturer for fence of the same quality of material and perfect construction. From 32 cents per foot for the fence 30 inches high, up to 99 cents per foot for the 60-inch fence, offers you a range of prices from which you can order a fence to suit your requirements with a comparatively small investment.

At 32 cents per running foot and upward, the cost of enclosing your grounds with Vulcan Wrought Steel Fence is brought down to a point where you cannot afford to leave your premises open or practice false economy by using unsightly wooden pickets or plain board fence. Supposing your lot to be 50 feet wide, the entire cost of ornamenting the front with Vulcan Wrought Steel Fence 36 inches high, complete with one single walk gate 3 feet wide, and one double driveway gate 9 feet wide, and all the necessary end posts and gate posts would amount to only \$42.50 on board the cars at the factory in Indiana. This would make a valuable improvement to your property at a small cost.

Vulcan Wrought Steel Fence is made of the same high grade materials and with the same perfection of detail as our Hercules and Atlas fence described on the preceding pages. You will notice by referring to the illustration the plain but pleasing design without ornamentation of any kind except as shown on the gate and on the corner posts, end posts and gate posts. For those who do not care for a highly ornamented fence our Vulcan design will fill every requirement and give the same satisfactory service as the more fancy and therefore higher priced fences.

The pickets are spaced 4 inches from center to center on all sizes of Vulcan fence up to and including 48 inches high. On the 54 and 60-inch fence the pickets are spaced 5 inches from center to center. Vulcan pickets are made from the same grade of steel used in our higher priced fence and are secured to the channel rails in a manner to prevent their ever becoming loose. The schedule on opposite page shows the thickness of pickets used on the various heights of fence.

The channel rail used in Vulcan fence varies in size according to the size of fence it is intended for, the proper size being determined from the experience of many years of fence manufacture. All sizes of fence up to and including 48 inches high are made with wrought steel channel rail $1\frac{1}{4} \times \frac{1}{2}$ inch, excepting the 30-inch

fence, on which the channel rail is $1 \times \frac{1}{2}$ inch. The 54-inch fence has $1\frac{1}{2} \times \frac{1}{2}$ -inch channel and the 60-inch has $1\frac{3}{4} \times \frac{1}{2}$ -inch channel.

Line posts are included in the per foot price of the fence and are placed as near 8 feet apart as the space will permit. To further strengthen the fence and prevent the panels from sagging in the center substantial supporting feet with anchors are placed midway between the line posts. The line posts furnished with Vulcan fence are the same as supplied with our higher priced Hercules and Atlas fence.

End, gate and corner posts are not included in the per foot price of Vulcan fence, but are charged extra at from \$2.00 to \$3.50 each, according to size of fence as shown in price list on opposite page. The same substantial and beautiful openwork design of end posts, corner posts and gate posts used on our Atlas fence is also supplied for Vulcan fence. The ornamentation on this openwork post adds just the right touch of style to make this fence most pleasing to the eye.

The gates are substantial, made of the finest material to match the design of the fence as shown in the illustration. The ornaments made of malleable iron are firmly attached to the gates with rivets. Vulcan gates are self closing and open either way from either side. All gates should be measured in the line of fence, adding \$2.50 extra for each single walk gate 3 feet wide, and \$5.00 extra for a double driveway gate 9 feet wide, if required.

Send us your order for a wrought steel fence and you will be sure of having the very best, rather than experiment with cheaply constructed fence of doubtful quality. When you have one of our wrought steel fences erected on your grounds your home at once takes on a new dignity and attractiveness that very materially increases its value so that the original cost of the fence becomes a profit rather than an expense. No matter which style of wrought steel fence you order from these pages, you have our positive assurance that it is the very best fence that could possibly be made for the price and that you are saving an amount of money equal to the usual dealer's profit.

We guarantee wrought steel fence to be everything we claim for it, and that it will give you entire satisfaction. It will reach you in perfect condition ready to be set up, painted a nice glossy black, and plainly printed instructions accompany each fence so that anyone can erect it properly with the ordinary tools commonly found in every home. You can order without hesitation and feel assured that if everything is not entirely to your satisfaction in every respect we stand ready to make it satisfactory and will return your money to you with instructions for returning the fence directly back to the factory.

Beechmont Wire Fabric Ornamental Fence

BEAUTIFY your home with one of the handsomest ornamental fences ever offered by us or anyone else at anything like the price. Your front lawn, your side yard, suggests the thrift and comfort within, exactly according to the effect upon the eye as you approach it. Appropriate furnishings within are unknown to the passerby, except as suggested by the care taken with the approaches to the house.

At 34 cents per running foot and upward you can accomplish this pleasurable effect on yourself and your friends as they approach your home by the use of this, our choicest design of steel and galvanized wire fencing, our Beechmont Ornamental Lawn Fence.

Thirty-four cents and upward, according to the height desired, and you can be supplied with it in five heights from 34 cents to 46 cents per running foot, exactly as illustrated and priced on opposite page as Catalog Nos. 61D5190 to 61D5194.

Beechmont Ornamental Fence enjoys the distinction of original symmetry and beautiful design. Its dignity elicits praise not attracted by any other make. You can appreciate these facts by carefully noting the illustration on opposite page and comparing it with any fence offered by any other manufacturer at anywhere near the price. Observe the tubular steel corner and gate posts $1\frac{3}{4}$ inches in diameter. The line posts are also $1\frac{3}{4}$ inches in diameter, and are included in the measurements of the fence at its price of 34 cents per running foot and upward. These line posts are set as near 7 feet apart as space will permit. Note the tubular top rail on which the cresting is mounted is furnished $1\frac{3}{8}$ inches in diameter, while the malleable crestings attached to it are of the strongest, most ornamental design ever furnished by us or anyone else.

Thirty-four cents per running foot and upward includes the galvanized twisted wire fabric, exactly as illustrated, with its overlapped and interwoven cable wires, joined in ingenious construction to make it strong, close, firm and providing for contraction and expansion of heat and cold of the varying seasons. Note the total height to the top of the cresting is 7 inches greater than the height of the fabric alone.

Beechmont Ornamental Fence is equipped with twisted wire pickets, interwoven exactly as the illustration clearly shows, and while all our wire fabric is stronger than any fabrics offered in any other fencing, yet the fabric used in this, our Beechmont Ornamental Fence, at 34 cents per running foot and upward, excels in its extra center twisted wire, making the lower division so close that poultry and small animals do not pass between. The 24-inch fabric has four line wires, the 30-inch fabric five line wires and an extra line wire is added for each additional 6 inches in height, giving the 48-inch fabric eight line wires.

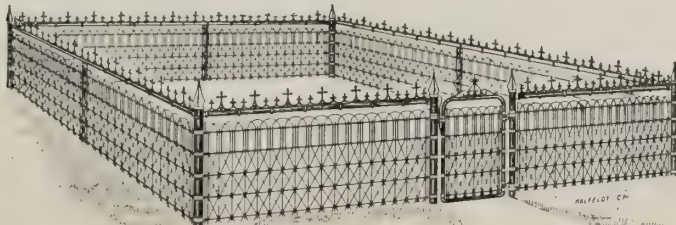

While on the other pages we show a most attractive assortment of ornamental fencing of like character to this, our beautiful Beechmont pattern, and while we guarantee them all on their separate and distinct merits, yet we cannot avoid pressing upon you the extra strength and beauty of this, our Beechmont Ornamental Fence at 34 cents to 46 cents per running foot, according to height selected.

We furnish double drive gates, double walk gates, and single gates, exactly as desired, and only add the small price of 55 cents extra per running foot for the width of each gate, added to the full lineal measurement of the fence, so that, for example, a 3-foot gate costs \$1.65, added after measuring in the full length of the fence, including the gate.

All line posts are measured in and included in the price of the fence itself, but each gate post, end post or corner post we furnish at an extra price of 66 cents each, although in measuring the full length of fence required these posts should also be included in the measurement.

Select the height of fence desired from the catalog numbers given on the opposite page, sending us a rough sketch with correct measurements of the lawn, yard or lot, locating each gate accurately, and we guarantee to fill your order correctly for any size or form of grounds.

Marble Tombstones and Monuments

Acme Blue Dark Vein Vermont Marble. There is no other marble except it be the White Clouded Rutland Italian Marble to compare with this wonderful material in closeness of texture, beautiful dark veining, the mirror polish it receives at the hands of skilled artisans, its noble response to the touch of the sculptor's art, and its indestructibility by ages of weather exposure. This beautiful marble from the native hills of Vermont is even superior to the much talked of imported Italian marble, when exposed to the action of the elements in all kinds of weather, for all time.

White Clouded Rutland Italian Marble. This world famous material, polishing to its beautiful white mirror finish, with its light clouded effect, is of like closeness of texture, hardness and durability under ages of weather exposure as its companion marble from the adjacent Acme Blue Dark Vein quarries. The slight difference in price on the various designs illustrated in the succeeding pages does not indicate one iota of difference in the quality of the material, but the excess supply of the Dark Vein stock enables us to furnish it at a slightly reduced price. The fame of the White Clouded Rutland Italian Marble has gone before it, and we need not comment on its merits, as it is known too well to need our praise. To the lovers of emblems of purity for cemetery purposes, nothing can supplant our White Clouded Rutland Italian Marble.

Our Insurance Against Disappointment.

Send us your order for any tombstone or monument shown in the succeeding pages, and we will make it to order for you, sawing, carving, shaping, tracing, polishing and finishing it exactly as described, lettering it according to the inscription you furnish us, boxing it carefully and shipping it from the marble works in Vermont to your home station, with the distinct understanding and binding agreement that if it is not all and more than we claim for it, finished exactly as illustrated and described, lettered exactly as you have ordered it, arriving free from mar, scratch, injury or blemish of any kind, you can hold it subject to our disposal, at our own total loss, and we will return you the money you have remitted us, together with any freight charges you may have paid. This convincing offer and open proposition of insurance against disappointment places all the risk on us, and should convince you that you cannot afford to order a tombstone or monument elsewhere.

We do all lettering for you. Do not confuse lettering on marble with lettering on granite. The prices quoted on this page do not apply to granite, but to marble only.

Why Not Protect Lonely Single Graves?

Our Wire Grave Guards with arch and hanging basket, strongly built with angle steel frame and heavy corner posts for sinking into the ground, will shield a single grave from intrusion, and its wire arch and hanging basket will ornament it. This wire guard is strongly built of angle steel, firmly fastened by bolts, and the sides made of heavy woven wire. It is well painted in green to protect it from weather exposure, and we only furnish it in this one color. It is taken apart and shipped closely packed, but is readily placed in position by boy or man. The heights of the various sizes given are of the wire fabric, and do not include the angle steel legs which are to be driven in the ground. They come painted green only.

Our Forefathers Used Them; Why Not We? They Are Still Standing in the Old Churchyards and the Old Family Graveyards. You Recognize Them From These Illustrations and They Bring Tender Memories.

These simple types of tombstones are still as popular with the people as they were with our forefathers, but not so popular with the manufacturers of tombstones, since they do not bring the exorbitant prices and larger profits to be obtained from the more elaborate styles and designs.

We feel that the wants of the people should be supplied. We present two types of these favorite tablets in White Clouded Rutland Italian Marble. The face, edges and top of the tablets are polished, but the back is fine sand rubbed. All bases are sanded finish and mortised 2 inches deep to receive the tablet.

The carving is a beautifully executed example of modern marble working genius, showing a broken tree stump with its trimmed off branches, from one of which a polished scroll is apparently suspended, but really carved from the same solid marble block, giving ample space for lettering inscription. Additional space for lettering is offered by the diagonal polished panel below the scroll.

From the bottom of the base to the top of the stump this monument measures 4 feet 2 inches, and a fair idea of its massiveness can be gained from the fact that it weighs more than 1,000 pounds.

You will be pleased with this monument whether you order it in our Acme Blue Dark Vein Marble or the famous White Clouded Rutland Italian Marble, either of which will give you a monument that for beauty, durability and value cannot be equaled for less than twice the price we ask.

You might imagine the freight on this massive stone to be quite expensive, but the actual figure will be much lower than you would probably estimate. From the scale of freight rates shown on page 108 the freight on this monument from the quarries in Vermont to certain points in your state can be figured exactly, and no matter where

you live, we guarantee to save you money, even after you have paid the freight.

A small sample piece of polished marble will be mailed upon receipt of 15 cents.

On pages 68 to 72 we illustrate a few preferred styles of lettering and give a few choice selections of memorial verses, and on page 19 we quote prices on foot stones and corner stones.

Delivered on the Cars at the Marble Works in Vermont.

This is one of the most attractive designs ever submitted to our customers and friends. The upper block is carved from one solid piece with the back and ends shaped in rough rock formation, and the front scroll highly polished to receive the inscription in memory of the deceased. The flower and leaves are carved in full relief and the dove is of the same solid block of marble. The lower lines of this block, resting on the base, are polished on all four sides.

Nothing prettier or more attractive has ever before been offered by us or anyone else at anything like our prices.

If this artistic design pleases your taste, send us your order and feel assured that even after we have carved it especially for you, lettered it exactly as you have instructed us, that we will guarantee it to be exactly as illustrated and described, guarantee that it reaches you free from mar, scratch or injury in transportation or we will give you shipping instructions and return your money together with any freight you may have paid.

See page 108 where we quote the railroad rates of freight to a few towns in your home state, enabling you to determine just how much we can save you even after you have paid the railroad charges. On page 19 we quote prices for carving letters in marble and on page 72 we illustrate a few of the preferred styles of letters.

A Memorial That Is Simple, Yet Royal in Its Beauty \$25.90 White Clouded Rutland Italian Marble \$25.90

Delivered on the Cars at the Quarry and Marble Works in Vermont.

With its beautiful rose stems and blossoms carved in full relief, it contemplates the name in raised letters as illustrated, and is adaptable to the family name or the christened name, just as may be desired. Also it is adapted to receiving the full name and date lines in smaller letters, at the pleasure of the purchaser. The tablet is full polished on four sides, and if raised letters are used they are made with polished surface also. The upper base is full polished on four sides and where an inscription occupies the space alongside the flowers the family name could be carved in polished surface letters raised in panel on the upper base.

If this design appeals to your artistic sense, favor us with your order and let us shape, carve, polish, finish and letter it for you, resting assured that we will please you. We will ship it to you with the full understanding that if it is not all and more than we claim for it, is not finished exactly as illustrated and described, lettered exactly as you may instruct us, and does not reach you free from mar, scratch or injury in transportation, not only will we return your money to you promptly, but will include any freight you may have paid.

On page 108 you will find the railroad rates of freight to a few towns in your home state, enabling you to calculate just how much we will save you, even after you have paid the railroad charges.

ALL LETTERING EXTRA. While we do all the lettering for you, yet the variance of inscriptions furnished by different customers makes it fair to all for us to price the tombstone without letters and refer you to page 19, where we quote the price per letter extra in the various styles which are illustrated on page 72.

READ THIS CUSTOMER'S LETTER AND BE CONVINCED.

Sears, Roebuck and Co., Chicago, Ill.

R. F. D. No. 3, Apollo, Penn.

Dear Sirs:—To say I am well pleased with the tombstone would scarcely express half the satisfaction derived from this deal. Of the many hundreds of monuments and tombstones in this beautiful cemetery, none are more artistic in design and lettering than this one. It stands in the first tier of lots, beside a much traveled public road, with only a low picket fence between the road and the memorial, and the lettering is distinctly visible from the road. It cost me just exactly \$45.75, and the best offer from a local agent was \$76.00. If I had been at the quarry to boss the work I could not have pleased myself any better.

Very truly yours, W. R. REMALEY.

BEST EXPECTATIONS AND BEST IN THE CEMETERY.

Sears, Roebuck and Co., Chicago, Ill. R. F. D. No. 6, Freeport, Ohio.
Dear Sirs:—The monument is far beyond my expectations in quality and workmanship. It is the finest monument in the cemetery, regardless of cost. I prefer it to others that cost four times the amount I paid. Others say it is a fine stone. Yours truly, GEO. W. GRISINGER.

**\$15.40 to \$42.00 in Dark Vein Marble, Mirror Polished
and Traced, Exactly as Illustrated
\$17.65 to \$49.00 in White Clouded Rutland Italian Marble**

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Every feature of this design appeals to the good taste of our customers and friends. Its simplicity is relieved by the traced flowers and traced columns, while the remaining polished surface leaves ample room for inscriptions in memory of the deceased. We highly recommend it in dark marble with its beautiful veining, since it permits the ornamental tracing to stand out sharp and clear.

If this design meets your requirements in style, size and price, make your selection by catalog number and price and we will gladly make it to order for you, shaping, polishing, finishing and lettering it exactly as you instruct us, binding ourselves that it will reach your home station free from mar, scratch or injury in transportation, or we will gladly return your money, together with any freight charges you may have paid.

Vermont may seem a long distance from your home and you may hesitate to order on account of the freight charges. If you will refer to page 108 you will find where we quote the railroad rates of freight to a few towns in your home state, enabling you to determine how much we save you, even after you have paid the railroad charges.

LETTERING EXTRA. The reason we price all our tombstones and monuments without the lettering is because the carving of letters necessarily costs extra and some of our friends and customers require a large number of words, while others use very short inscriptions. Refer to page 19, where we quote prices on the various styles and sizes of letters carved in marble, and to page 72, where we illustrate the preferred styles of letters.

Sears, Roebuck and Co., Chicago, Ill. 41

Constantly striving to fill the requirements of our customers and friends in all parts of this great United States, we find a broad territory following the time honored custom of surrounding each grave with an ornamental coping or curb as illustrated in two styles on this page.

Customs of our forefathers are much beloved in cemetery work. Our Colonial settlers and our Revolutionary forefathers left indelibly impressed upon us customs we still love, that revive memories dear to them and still dear to us.

\$22.00 and Upward for This Grave Coping and Tombstone, Exactly as Illustrated and According to Size and Color Selected.

Delivered on the Cars at the Quarry and Marble Works in Vermont.
While we illustrate it in White Clouded Rutland Italian Marble at \$23.50 and upward according to size, yet it is equally attractive when finished in Dark Vein Vermont Marble at \$22.00 and upward according to size.

The sizes offered contemplate children's graves. The tombstone is also offered separately at from \$16.00 to \$28.20, according to its size and the color selected. The tablet or die of the tombstone is full polished and carved exactly as illustrated, while its base and the grave coping are fine sanded finish. The flowers in the tablet are carved in full sunken relief.

Freight on marble work to a distant state is not so serious an expense as you may think. We make this tombstone in three sizes of either color, and while the prices quoted do not include inscriptions, by referring to page 19 you will note that our charges per letter are very low.

Send us your order, and we guarantee that if it is not all we claim for it and entirely satisfactory to you, your money will be returned, together with any freight charges you may have paid.

Reduced Price, \$19.95

Delivered on the Cars at the Quarry and Marble Works in Vermont.

At \$19.95 we give you the full benefit of the cost of the quarried rough stock, the actual cost of the labor to shape, carve, design and letter, with but our one small margin of profit added.

We guarantee you a large saving, even after you have paid the low rate of freight on finished marble quoted on page 108, or your money will be returned, together with any freight you paid.

See page 19 about the low cost per letter of inscriptions on marble and our prices for foot stones and corner stones for cemetery lots.

See pages 68 to 72, giving illustrations of this beautiful marble, showing various styles of preferred letters and some popular verse inscriptions.

We especially recommend this beautiful design in the celebrated Acme Blue Dark Vein Marble. Our Most Exquisite Design, \$24.60 and \$30.90

Delivered on the Cars at the Quarry and Marble Works in Vermont.

This magnificent monument with its elaborately engraved, carved and traced design is made with a scroll traced on the top in which the dates of birth and death and name of the deceased can be placed, at the low prices per letter quoted on page 19. The upper base is beautifully polished and affords an excellent location for the family name, if it is desired, or, if not, the dates of birth and death can be placed upon this surface. The bottom base is of the exact same marble, not polished, but sand rubbed.

On pages 68 to 72 we show illustrations of the conventional styles of lettering and publish a few choice selections of memorial verses.

At our prices of \$24.60 and \$30.90 this is a phenomenal value. The immense amount of intricate tracing and etching necessary to produce this beautiful design encourages small dealers and local marble companies to charge fabulous prices when imitating it.

Turn to page 108, where we quote the freight rates on marble to a few points in your state.

We especially recommend this monument in the world's best Acme Blue Dark Vein Marble, as the tracing of the design stands out in a bright, clear gray against the dark polished surface. The design is very desirable in White Clouded Rutland Italian Marble, but in the dark veined it shows up to better advantage.

\$38.40 Draped Monument in Dark Vein Marble \$50.00 **\$46.00 White Clouded Marble \$60.00**

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Naturally you want to have just as nice a tombstone or monument as any in your cemetery, and we enable you to do so by placing within the reach of all a monument which for beauty and elegance cannot be surpassed. Nothing could make a finer appearance or be more attractive for its style and workmanlike finish than this elegant tombstone with its carved drapery hanging gracefully over one corner, its open book raised in relief on the top bevel and the design traced on the front, just as shown in the illustration.

We offer it in two sizes of splendid proportions. Make your selection of the size and color you wish, send us your order and we will guarantee to finish it exactly as illustrated, made of the best grade of Vermont marble, carving any inscription you may submit to us, and ship it to you with the full understanding and agreement that if you do not find it to be all that we claim for it and entirely satisfactory to you, we will not only return the money you have paid us, but will include any freight charges you may have paid. We further guarantee that it shall reach you free from flaw, scratch or injury in transportation, or we will replace any part or parts which may have become damaged. You have our assurance and our guarantee and we would be the loser if the tombstone did not prove to be all we represent it.

LETTERING EXTRA. The prices quoted are for the tombstone only without lettering, and all inscriptions are charged for extra at the prices per letter quoted on page 19. By this method you pay only for the exact number of letters in the inscription you wish carved on the tombstone. On page 72 we show illustrations of the modern styles of lettering which we use.

While our prices are quoted for delivery on the cars at the quarry in Vermont, the freight charges on monuments are exceedingly low. Do not let anyone convince you that it would not pay you to send for your tombstone on account of the freight charges, but refer to page 108, where we quote the railroad rates of freight to a few towns in your state, and you will find by computing the charges according to the weight quoted in connection with each catalog number and price, that you would still be able to make a large saving, even after paying the railroad charges.

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Very appropriate where it is desirable to erect one handsome monument at adjoining graves of father and mother, husband and wife, sister and brother, two sisters or two brothers.

The bottom base is of high grade marble, plainly sawed and finished by sand rubbing only.

The upper base is rock face finish all around, with a portion of the face cut away and polished to admit the carving of the family name, if so desired.

The slab or tablet is rock finish, except the face, which has a beautiful polished surface, showing the very handsome grain and vein effect of the marble. On this face the names, births and deaths are carved.

Dear Sirs:—I received the tombstone and am well pleased with it. There is not a nicer stone in our cemetery.

\$20.00 and Upward, According to Size and Color, for This Double Tablet on One Large Base

Delivered on the Cars at the Quarry and Marble Works in Vermont.

If you have been contemplating erecting memorials for two adjoining graves and have put it off from time to time on account of the expense it would mean, why not erect one of these double tombstones, which would not only mean a saving in cost to you, but make a splendid appearance on any lot?

Send us your order and we will guarantee to finish it exactly as illustrated, polishing the die on four sides, carving the ornamental tracing on the front just as shown, and ship it to you with the understanding and agreement that if you do not find it all we claim and entirely satisfactory to you, your money will be returned together with any freight you may have paid. If the railroad company should damage it in any manner, we will replace the part free of expense to you.

We will carve any inscriptions you may desire, at the prices per letter quoted on page 19 for carving letters in marble. You can calculate what the lettering will cost you from this schedule of prices, or tell us the tombstone you prefer, making your selections by catalog number and price, giving us a copy of the lettering you intend to have carved on the tombstone, and we will gladly submit you a typewritten copy of the inscriptions, with an estimate of the price of the complete job. See page 72 for illustrations of the popular styles of lettering which we use.

The matter of freight charges is a small item when compared with the saving we can make you in price. Vermont may seem a long distance, but the rates of freight on tombstones are very low, and by referring to page 108, where we quote the railroad rates of freight to a few towns in your state, you can estimate what the charges will amount to on any stone you may select, as we carefully quote the weight in connection with each size of each design.

\$22.00 to \$32.00 Our Low Prices for This Double Design in Either Dark Vein or White Clouded Marble

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Can you afford to neglect the graves of father and mother, brothers and sisters, or other relatives resting side by side, when for such a moderate sum you can secure this appropriate double tombstone? The words Father and Mother can be changed for any other two words which may be desired. The tablet is full polished and the carved dividing line in the center allows plenty of space to the right and left for the inscriptions desired. We make this double tombstone in two sizes, and although the illustration shows the dark vein marble, it is equally as attractive in the white clouded marble.

Send us your order, and when you consider that you are fully protected against disappointment or loss by our guarantee that if it is not all we claim for it and entirely satisfactory to you, and if it does not reach you free from mar, scratch or injury on the part of the transportation company, we are to return your money, together with any freight charges you may have paid, and give you shipping instructions for the return of the monument, or replace any part or parts which may have become damaged in transit, free of expense to you, you will understand our confidence in the quality of material and workmanship which we are able to offer at these low prices.

LETTERING EXTRA. We will carve any lettering you may desire, and since the prices quoted on this page for the tombstone are based on the actual cost of material and labor, the lettering is charged for extra at the price per letter quoted on page 19. The modern styles of letters which we use are illustrated on page 72.

FREIGHT CHARGES. Even with the freight charges added, your saving will be a large one. The railroad companies carry tombstones and monuments at a low rate of freight, and by referring to page 108, where we have listed the railroad rates of freight to a few towns in your state, you will be able to calculate about what the freight will amount to on any tombstone, since the weight of each size is quoted in connection with the catalog number and price.

\$25.60 Double Tombstone in Dark Vein Marble White Clouded Rutland Italian Marble, \$30.00

Delivered on the Cars at the Quarry and Marble Works in Vermont

People sometimes imagine that to purchase a suitable tombstone or monument means the expenditure of an enormous sum of money, because they have not learned of the moderate prices at which we place before the public a line of tombstones and monuments varying in style and price to meet the taste and means of all.

The polished strip across the top is intended for the family name in raised letters, and we can carve any other two words which may be desired in place of "Father" and "Mother" shown in the illustration. The polished face of the die will receive the desired inscriptions satisfactorily.

Send us your order for the size and color you prefer, and if we do not fulfill our guarantee to ship you a tombstone made of the best grade of Vermont marble, finished exactly as illustrated and described, lettered as you have instructed us, and if it does not reach you in perfect condition, free from scratch or injury in transportation, we will return your money, together with any freight charges you may have paid, or replace any part necessary, free of expense to you. We could not give this binding guarantee, fully protecting you against loss or disappointment, if we were not confident of the material and workmanship which we furnish.

THE ONLY CHEAP THING ABOUT THEM WAS THE PRICE.

New Castle, N. H.

Sears, Roebuck and Co., Chicago, Ill.

Gentlemen:—I have received the tombstones in fine condition and can truthfully say that they far exceeded my expectations. They were so cheap I was afraid, but the only cheap thing I find about them is the price. They are fine. Please accept my thanks.

Yours truly,

FRED BELL.

ARRIVED IN PERFECT CONDITION AND BETTER THAN EXPECTED.

135 Grand Trunk Ave., Battle Creek, Mich.

Sears, Roebuck and Co., Chicago, Ill.

Dear Sirs:—I have received those marble tombstones and had them erected. We are quite pleased with them. We went out to see them and found them in perfect condition, and better than you described them.

Respectfully,

EDWIN R. ALDRICH.

At \$39.50 to \$86.00 in Acme Blue Dark Vein or White Clouded Rutland Italian Marble, according to size selected, it scarcely seems possible to more than pay for the beautiful material which enters into this elegant monument. Examine the illustration and the measurements carefully, noting the three large sizes in which it is made, then compare it with a monument of like size, style and quality offered by anyone else and see how much we save you, even after you pay the low rate of freight on finished marble.

We use only the best grade of Vermont marble in either color, and you can make no mistake by purchasing one of these monuments.

Why we can sell at such low prices. Our "quarry to cemetery" plan is not subject to any of the high expenses incident to the old fashioned, high priced, long profit selling methods. We have no losses by bad debts, nor do we pay high commissions to traveling agents. We own the rough stock at the lowest possible cost to quarry; we shape, carve, finish and letter these fine products under the most approved, modern methods, making our prices to you based entirely upon the actual cost of material and labor, reserving for ourselves but our one conscientious margin of profit.

\$39.50 and Upward for This Large, Massive Monument, According to Size and Color Preferred

Delivered on the Cars at the Quarry and Marble Works in Vermont.

You cannot afford to miss this opportunity of erecting a monument on your cemetery lot when we have made our prices so low as to place within the reach of all a big monument of such dignity and beauty as to attract the admiration of all. The large upper block or die is handsomely polished and traced on all four sides, just as illustrated, and the apex top is sand rubbed. The upper base, allowing plenty of space for the family name, is polished four sides, and the large bottom base is sand rubbed, altogether making this an ideal monument either for a family lot or single grave. It is made in three sizes, each being perfect in proportion, and you can make your selection according to price and the color preferred.

LETTERING ON MARBLE. We will carve any inscriptions you wish placed on the tombstone, and while lettering costs extra, by referring to page 19, where we list our prices for cutting letters in marble, you will find that the lettering is only a small item. On page 72 we illustrate the popular styles of lettering which we use.

Let us make you one of these tombstones in either Acme Blue Dark Vein Marble or White Clouded Rutland Italian Marble, lettering it exactly as you instruct us and shipping it to you under our guarantee that it must reach you without flaw, scratch or injury in transit, or we will replace any part necessary free of expense to you. We guarantee the material and workmanship to be all we claim for it and entirely satisfactory to you, or your money will be returned, together with any freight charges you may have paid.

Freight charges on monuments are very low, and on page 108 we quote the railroad rates to a few towns in your home state, enabling you to estimate just how much we can save you.

In Acme Blue Dark Vein Vermont Marble at \$63.98 and upward, or in the world famous White Clouded Rutland Italian Marble at \$78.72 and upward, delivered on the cars at the quarry and marble works in Vermont.

This grand sarcophagus is a symphony of massive dignity and is equally as beautiful whether furnished in Acme Blue Dark Vein Vermont Marble or in White Clouded Rutland Italian Marble.

Send us our catalog price, carefully selecting by catalog number the size and color you desire, give us the inscription you desire placed upon the monument, and we will fill your order under our binding guarantee. See page 19 for our low cost per letter for inscriptions on marble and our prices on foot stones and corner stones for cemetery lots.

Our binding guarantee and insurance. We will make one of these magnificent monuments to order for you, guaranteeing its safe arrival at your station, free from injury by the railroad. You can receive it, open the boxes, examine it carefully and if it is not exactly as represented, if you are not thoroughly satisfied in every way, you can hold the shipment subject to our orders, and we will return you the full amount, together with any freight charges you may have paid. When you consider that this means the total loss of all the workmanship and, being lettered with the inscription you furnished us, of no value whatever thereafter, you will appreciate more fully this binding guarantee and convincing argument.

Send us your order, giving us six to eight weeks to finish, letter and ship this large monument. Then allow sufficient time for it to reach your home station, remembering that if you delay your order you may not be able to get it in time for the date you have determined upon, especially immediately prior to Memorial Day, when our orders are heaviest and everyone desires monuments in time for that day of decoration of our country's graves.

The rate of freight on finished marble is very low and we guarantee you a large saving, even after you have paid the freight. On page 108 we name the freight rate per 100 pounds to a few points in your state.

\$10.50 Splendid Value in Dark Vein Marble; or White Clouded Rutland Italian Marble, \$12.60

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Compare your cemetery lot with others. Does it look a little bit neglected? For the small sum of \$10.50 and upward, according to size and color selected, we enable you to erect a monument which is equal in quality and appearance to any in the cemetery which has cost a great deal more.

You can send us your order without hesitation and with full confidence in our guarantee that it will be all we claim for it, exactly as illustrated, lettered as per your instructions to us, and will reach you in perfect condition, or we will return your money, together with any freight charges you may have paid, giving you shipping instructions for its return to the quarry, or we will replace any part which may have become damaged in transit, free of expense to you.

Lettering is not included in the prices quoted on this page, but by referring to page 19 you will find our charge for carving letters in marble is very low, and will not add materially to the cost of the tombstone. On page 72 we show illustrations of the popular styles of letters which we use.

Even after you have paid the freight charges, your saving will still be a large one, since the rates of freight on monuments are very low. Refer to page 108, where we quote the railroad rates to a few towns in your state, and by estimating the total freight charges on any monument from the weight quoted in connection with each size, you will be convinced that it is to your advantage to place your order with us.

\$17.50 to \$47.00, According to Size and Color Selected

Delivered on the Cars at the Quarry and Marble Works in Vermont.

These low prices enable you to own a beautiful monument at such a moderate expense that it means an economy on your part to purchase one. The improvement in your cemetery lot and the satisfaction you will feel in having it appear as nice as any in the cemetery will make you wonder how it can be accomplished at such a small cost to you. The "Rock of Ages" design is one which has always been popular for monumental purposes and we furnish it just exactly as illustrated, with the shaft polished and traced on four sides. The cross and the words "Rock of Ages" are traced on the front only and are included in the price. The upper base is polished four sides, intended to receive the family name of the deceased in raised letters if desired, and the big bottom base is sand rubbed.

We make three sizes, each perfectly proportioned, and you can make your selection by catalog number and price of the color you prefer. The illustration shows the Acme Blue Dark Vein Marble, but it is equally beautiful in the White Clouded Rutland Italian, although the design tracing will show up to a little better advantage on the dark vein marble.

We will carve any inscription you desire, at the prices per letter quoted on page 19. See page 72 for illustrations of the approved styles of letters which we use.

The freight will amount to very little when compared to the saving you will make. On page 108 we quote the railroad rates of freight to a few towns in your state, enabling you to estimate the freight on any monument from the weight quoted in connection with each size.

Most Expensively Carved and Finished Big Marble Monument for Only \$29.40

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Our price of \$29.40 means a large saving to you even after you pay the freight. Means that you will secure a monument which will compare favorably with any monument that is being retailed at a much higher price elsewhere. It means that you will secure a monument which is made of the very choicest Vermont marble, the celebrated Acme Blue Dark Vein marble, which is not obtainable anywhere else at anything like our price.

It is generally supposed that the imported Italian marble is the best marble for monumental purposes, but it is a well known fact that Acme Blue Dark Vein Marble has stood identically the same test as the Italian marble and is even more impervious to atmospheric conditions than the Italian marble.

See page 108 where we name the freight rates on monuments to a few points in your home state.

\$49.00 Modern, Up to Date Monument in Dark Vein Marble; Or White Clouded Italian Marble, \$60.00

Delivered on the Cars at the Quarry and Marble Works in Vermont.

This new design in the variety of sizes and range of prices which we offer will enable you to erect a monument on your cemetery lot of which you will feel proud, and which has heretofore seemed beyond your means. You cannot afford to have your cemetery lot look neglected or to erect a stone which will be merely a memorial and nothing more as far as pleasing design is concerned, and will not detract to the good appearance of your cemetery lot, when we place within the reach of all a monument which for quality, workmanship and beauty will equal any in the cemetery. The purchase of a tombstone is one which you make perhaps but once in a lifetime, and of course you want the memorial which you erect to remain forever a tribute to your good taste and judgment. One of these tombstones, in any of its sizes and in either the dark vein or white clouded marble, with its polished cube set artistically in the top of the shaft, which is polished four sides, its polished upper base intended to receive the family name in raised letters if desired, and its big sand rubbed bottom base, will more than please you, and attract the admiration of passers by.

The lettering is charged for extra at the prices quoted on page 19 for carrying letters in marble. We will carve any inscriptions you may desire, and on page 72 we show illustrations of the modern styles of letters which we use.

The freight charges will not add materially to the cost, since they are very low on monuments. See page 108, where we quote the railroad rates of freight to a few towns in your home state.

Send us your order under our binding guarantee to please you or return the money which you have sent us, together with any freight charges you may have paid.

Erect one of these designs with its big bottom base, upper base polished on four sides intended to receive the family name in raised letters if desired, its polished finished plinth with each corner ornamented by the raised carving just as shown, upon which the polished cross rests, and when your friends and neighbors admire it and passers by remark on its beauty, you will fully realize that you could not have done better.

Do not hesitate in sending us your order, fearing that you may be disappointed. The illustration shows the monument exactly as it will be finished, and we guarantee to please you in every particular. We use only the best grade of marble, and if you do not find the tombstone all we claim for it, lettered exactly as you have instructed us, and if it does not reach you in perfect condition, we will return the money you have sent us, together with any freight charges you may have paid, giving you instructions for its disposal, or will replace any part which may have become damaged in transit, free of expense to you.

Inscriptions are charged for extra at the prices per letter quoted on page 19 for carving in marble. See the illustrations of the popular styles of lettering which we use on page 72.

The matter of freight interests you. On page 108 we quote the railroad rates of freight to a few towns in your state.

A BEAUTY AND WELL WORTH DOUBLE THE PRICE.

Sears, Roebuck and Co., Chicago, Ill.

Huntington, Texas.
Dear Sirs:—I am highly pleased with my monument. It is worth double the price that I gave for it and is satisfactory in every respect. I really believe that it is a better grade than I could get elsewhere, and my friends say it is a beauty to look at.

\$50.00 to \$99.00 for This Rich Modern Design in a Variety of Sizes

Delivered on the Cars at the Quarry and Marble Works in Vermont.

Are the lots surrounding yours in the cemetery made attractive by handsome memorials which you may think beyond your means to equal on your lot? Examine this illustration made from a photograph of the monument itself. Notice the highly polished ball resting on the beautifully carved top of the shaft, the beautiful tracing and margining on the shaft, the polished upper base intended to receive the family name in raised letters if desired, and the big sand rubbed bottom base. Could anything be more attractive or have more style or beauty than this design? Notice the low prices at which we offer it in dark vein or white clouded marble in three sizes. Determine on the size and color you prefer and send us your order with perfect confidence that it will be all we claim for it, or your money will be returned, together with any freight you may have paid.

Send us a copy of the lettering you wish carved on the stone, calculating the cost at the price per letter quoted on page 19 for letters carved in marble. We guarantee to inscribe the stone exactly according to your instructions to us. On page 72 we illustrate the approved styles of lettering which we use.

The freight charges are very low on monuments and will still allow you a large saving. Refer to page 108, where we quote the railroad rates of freight to a few towns in your state.

Sears, Roebuck and Co., Chicago, Ill. 67

A Collection of Preferred Verses in Memoriam

TO ASSIST those who may not have the opportunity to select for themselves, we show here a collection of memorial verses used most frequently on tombstones and markers sold by us. The frequent requests of our many customers for us to furnish a verse suitable has encouraged us to present this collection and show the price of each verse when cut in marble and when cut in granite. We have not attempted to furnish a large assortment of verse inscriptions, but trust these will be of service to those who may not have the opportunity to make a selection from other sources. Please do not overlook the difference in the price per letter between marble and granite. For prices on all sizes of marble letters see page 19. If you are ordering a granite job do not fail to pay close attention to the price of granite letters shown on page 73, remembering that it costs a great deal more to cut, carve and letter this hardest of hard

material, Barre Granite. If you are ordering any one of our wonderful values in Acme Blue Dark Vein Marble or White Clouded Rutland Italian Marble, you can figure the name and date lines in ordinary sunk inscription letters 1½ inches and under at 6 cents per letter, the family name in 1½-inch letters, raised ⅛ inch in panel, at 15 cents per letter, adding the price of the verse desired, together with the catalog price of the tombstone or monument you select, and it will enable you to know exactly what the complete memorial will cost you delivered on the cars at the works in Vermont. While all inscriptions are engraved to order, and therefore of no value to us after the lettering is done, yet under our open proposition and convincing offer against competition, if any of our monuments and tombstones are not lettered exactly as ordered, you can notify us and we will give you shipping instructions and return your money, together with any freight charges you may have paid.

Limoges Porcelain Portraits for Tombstones and Monuments

A popular and appropriate manner of showing respect and affection to departed loved ones.

Limoges Porcelain Portraits are ovals of clear white porcelain on heavy pure brazier's copper. The porcelain being baked on at a high degree of temperature makes them practically imperishable and unaffected by heat, cold or moisture. They are set in a mortised recess in the monument in a manner which binds them to the stone so firmly that they become practically a part of the monument itself.

The illustration on opposite page shows the beautiful appearance of these Porcelain Portraits when placed on a tombstone or monument. A reproduction from any picture is photographed directly in the porcelain and a finishing coat of transparent enamel glaze is baked over it, making a beautiful and permanent portrait in pure white porcelain which can be placed on almost any style of monument you select.

The mark of respect and affection shown by placing an imperishable likeness on the monument of departed loved ones is becoming more popular as people come to see its beauty and appropriateness.

In ordering a Limoges Porcelain Portrait for a monument give the catalog number representing the size you prefer, and send along with the order the photo you want copied on it. The picture on the porcelain will be an exact copy of the photo you send us, and the photo will be returned to you uninjured.

The prices quoted include the Limoges Porcelain Portrait complete, set in any monument or tombstone ordered at the same time, just as described above, without any extra cost and guaranteed to be satisfactory in every particular.

The illustration shows the Limoges Porcelain Portraits slightly reduced in size. The exact measurements to the outer edge of the five different sizes before setting the white margin in the under cut stone, are given in the following list of prices:

				Set in Marble	Set in Granite
No. 61D6381	Size, 2 $\frac{1}{4}$ x2 $\frac{3}{4}$ inches.	Price, each, complete.	\$ 4.13	\$ 5.63

See illustration on opposite page showing marble monument with porcelain portrait.

A Limoges Porcelain Portrait Attached to Marble Monument

(See Opposite Page for Description and Prices.)

This illustration shows how these beautiful photo reproductions in pure white porcelain appear when placed on a monument, making an everlasting token and memorial of the loved one called away.

The schedule on the opposite page gives the exact sizes and prices of Limoges Porcelain Portraits, reproduced from any photo you furnish and firmly set in any monument ordered at the same time.

When ordering a tombstone or monument do not fail to give careful consideration to the illustrations on this and the preceding page. If you have a photo of the deceased for whom you are contemplating erecting a marble or granite memorial, no more fitting evidence of affection can be shown than by placing one of these beautiful white porcelain portraits on the monument, and the complete cost is much less if ordered at the same time you are ordering the monument.

Barre Granite Monuments and Markers

Dark Barre Granite for polished surfaces and Light Barre for fine hammer finished monuments are world famed. Indestructible by weather exposure, and so hard that cutting from quarry, sawing in blocks, shaping into monuments, polishing to bring out the bright mirror like bluish mottled effect, carvings, tracings and lettering inscriptions, require the most laborious efforts by hand and machines; so hard that pneumatic tools must be used, guided by the hands of the most skilled craftsmen. Years ago we entered into the monument and tombstone business in marble only, applying to it our theory, principle and practical method of eliminating the large expenses and profits of the old high priced method of selling tombstones; eliminating the expenses and profits of the dealer in rough stock; eliminating the expenses and profits of the wholesale dealer in finished designs, and last, but most important, eliminating the profits and large commissions of the traveling agent. The results are shown in the low prices we quote in the preceding pages of this book, where our marble cemetery work is so fully displayed.

In the granite field we have applied the same principles and practical methods, owning our rough stock of the Best Barre Granite from the best strata in the Barre, Vermont, Mountains, loading it on cars, switching the cars to the granite mill and works adjacent to the quarry, unloading the immense blocks by automatic cranes and carefully drilling them with pneumatic power drills, separating them into the various size slabs and blocks required for the designs we show in the succeeding pages of this book. Then comes the more laborious task of shaping the smaller blocks into the designs desired for our customers' orders, requiring automatic machines and flexible shafts with pneumatic tools attached. Our polishing is done to the highest perfection of mirror finish, and we do not "dope" our polished surfaces to cover flaws or give a color to the surface that is unnatural and will come off by weather exposure. If the polishing of a block develops a bad spot, we throw it out and cut it down to a smaller size to get rid of the bad spot or flaw and take a new block for the same job. Employing only the highest grade of highly skilled granite craftsmen, using only the most modern and efficient tools and machines, selecting only the highest of high grade blocks of granite for our work, we deliver on board cars for shipment to our customers memorials in granite unsurpassed by any other concern in the world, and at prices within the reach of all.

POLISHED DESIGNS. In selecting a monument, tombstone or marker in granite, remember that the exceeding hardness of the material creates a cost in polishing that far exceeds that of marble. Therefore, we recommend that you do not ask us to polish any more of the surfaces than we illustrate in the succeeding pages, as the proportionate cost would be too great and the results not near so handsome or satisfactory as the way we illustrate them.

ROCK FACE SURFACES. The irregular surface, known as the rock face surface, on a number of our granite designs, is most attractive and in great demand. While our illustrations show some regularity in the drawing or photograph, yet these rock face surfaces are very irregular, and every elevation and depression on them is different from the other. This irregularity of the rock face surface is its attractive feature. For this same reason we are only able to quote estimated weights instead of accurate weights, as this variation in the rock face surface makes a variation in the weight above and below our estimated weight. But in no instance will the weight vary more than 10 per cent above or below the weights we print.

White surfaces on polished designs. These surfaces illustrate the unpolished appearance of the granite when rock faced, or when hammered, in tracing and margining

the design of the polished surface. The beveled edges or wash cut are axed or hammered in the same manner.

GRANITE MARKERS. In the illustrations of the granite markers without base will be observed a suggestion of a stub or rough butt below the ground, but we do not recommend them with the stubs, as the weight of the stub is three or four times as much as the finished part above the ground, and our customers much prefer to place them on a concrete bed made of crushed stone slushed in with cement, or gravel slushed in with cement, rather than pay the freight on the rough stub. Those who prefer these markers with the rough stub below the ground, all in one piece with the marker, can be supplied, but we cannot give the exact shipping weight, as the stubs are very irregular, no two of them being the same size, although uniform in length.

LETTERING. We do all the lettering for you, and the monument or marker reaches you complete, all ready to set up in the cemetery. Do not confuse these prices with lettering on marble. Inscriptions on marble cost much less. For prices of lettering on marble see page 19. When sending your order be sure to write the inscription plainly so there will be no delay in writing you to verify the correctness of the inscription you desire placed on the granite work. We quote below prices on all styles of granite lettering.

\$290.00 Celtic Cross \$584.00

Made of the Choicest Grade of Light Barre Granite.

Delivered on the Cars at the Quarry and Granite Works in Vermont.

To the lovers of Celtic art we do not need to address ourselves in praise of this design. To those familiar with Light Barre Granite, its flint like texture, its close grained crystals, its superior resistance to weather exposure, it needs no praise from us.

This beautiful Celtic cross design in its various sizes, offered at the prices printed below, makes a noble memorial for any cemetery grounds. The raised band panel across the center allows ample space for all ordinary inscriptions, and V sunk letters can be used (see low prices quoted on page 73) and be in perfect harmony with the ornamental intaglio carving shown in the design of the cross. If raised letters are preferred, either cut square top as illustrated on page 81, or round top as illustrated on page 76 would be in perfect harmony with the round raised edges of the cross.

The broad bottom base lends additional dignity and provides a wash cut or pitched bevel ranging from 8 inches on the smallest size to 12 inches on the largest size.

While our prices are quoted delivered on the cars at the quarry and granite works in Vermont, yet on page 108 we quote the railroad tariff rates of freight on monuments to a few points in your home state, enabling you to determine what it would cost you after paying the low rate of freight prevailing on monuments. To those interested in the largest size, the carload rate of freight would apply and be much less per 100 pounds than the rates we print on less than carload shipments.

\$120⁰⁰ Wonderfully Simple, Elegant Design in Best Light Barre Granite \$287⁰⁰

Delivered on the Cars at the Quarry and Granite Works in Vermont.

All surfaces of the upper block are fine hammered, while the strong intaglio carving is fine tooled with high power pneumatic tools, and the sunken panel with its raised letters finished in like manner, carrying through to a beautiful perfection a simple, strong, artistic idea.

\$120.00 for the smallest size to \$287.00 for the largest size gives a range of selection within the means of all who are interested in a monument of this style and within a reasonable appropriation of money for the purpose.

While this monument is designed for the family name only, yet the panel can be widened to accomplish any full inscriptions that may be desired placed upon it, but we would always

recommend that these inscriptions be carved in raised letters to conform with the general style the design contemplates.

While our prices are for delivery on the cars in Vermont and the customer must pay the freight, yet by reference to page 198 you can readily estimate what a large saving we can make you on any one of these sizes of this splendid monument, even after you have paid the freight to your home station.

Wonderful Rugged Granite Beauty at \$76.00 ^{and} Upward

Delivered on the Cars at the Quarry and Granite Works in Vermont

Original and never offered before, but may be imitated hereafter by those who follow our lead and copy our ideas. A monument sketched for us, considered, reconsidered and resketched until the design was declared perfect in its own field of rugged beauty, relieved by its marginal corners, margined apex and margined polished panel. With perfection secured, we offer it at \$76.00 and upward.

Made of four separate blocks, consisting of bottom base, upper base, monument block or die, and a big projecting cap, all rock faced four sides, except the monument block, and projecting cap is margined as illustrated. While we illustrate the family name on the upper base in rock faced letters and recommend it thus for appearance sake, yet we can furnish smooth hammered letters or polished surface raised letters in the same manner if desired. The monument block is made of Dark Barre Granite, the better to receive the dark mottled polished panel, as provided for any and all the additional inscriptions desired. The other three blocks are made of Best Light Barre Granite, the better to display a contrast with the middle block.

Your order will receive our undivided attention, exactly as if it were the only monument we were carving. We will make it to order for you, exactly as illustrated, letter it in any manner you may require, taking all the risk of our binding guarantee that if it does not reach you free from mar, scratch or injury in transportation, is not lettered exactly as you have instructed us, and in the highest workmanlike manner, and prove a big saving to you, even after you have paid the freight, you can hold the entire shipment subject to our orders for disposal, and we will bear the total loss, returning you the money you have remitted us, together with any freight charges you have paid.

Do you know how low the freight rates are on monuments? Refer to page 108, where we name the freight rates to a few points in your home state, enabling you to calculate just how much you would save, even after the freight is paid.

Lettering is extra, because no two orders specify the same quantity of lettering, but on page 73 we name our low prices per letter for any inscription you may desire carved.

Delivered on the Cars at the Quarry and Granite Works in Vermont.

Examine the illustration of this monument, observe its magnificent projecting cap with its arched pediment front, its rock faced edges and fine hammered apex. Note the main body of the monument with its polished face and artistic tracing along the top line; it is mirror polished on two sides, but the leaf tracing is only on the face. The ends are rock faced. The main body rests upon an upper base that is rock faced on the four sides, with a provision made on the front for the family name in raised letters, and all this rests on the big heavy bottom base, which is rock faced all around.

Order one of these magnificent pieces of workmanship and remember that we guarantee it to be finished exactly as we illustrate and describe it, lettered exactly as you order it, guarantee it to reach your station in perfect condition and please you in every particular, or your money will be returned, together with any freight charges you may have paid. The Barre mountains may seem a long distance from your home station, but do not let this influence you, as the freight rates on finished granite are very low, as fully shown on page 108, where we quote the freight rates to a few points in your home state. See page 73 for cost of lettering inscriptions on granite.

Delivered on the Cars at the Quarry and Granite Works in Vermont.

Compare this top roll design granite monument at \$52.50 with any monument in your cemetery or any other cemetery, whether in the largest cities or the smallest villages, and you will find it excels any monument of like design and size at a much higher price.

\$52.50 to \$98.00, delivered on the cars at the quarry and granite works in Vermont, includes the mirror polished roll with its rock faced ends, the monument with both sides mirror polished and with rock faced ends, and the big base rock faced on all four sides.

The mirror polishing on both sides of the monument, the polishing on the roll, the tracing on one face of the monument and around the circle of the roll are all executed by the deft hands of highly skilled artisans, using pneumatic power tools on this flint like hardest of hard granite. The irregular surface known as rock face is most attractive and popular in granite work.

Order one of these big monuments and we guarantee it to reach you in perfect condition. Refer to page 73 and select the size and style of lettering you desire, adding the cost of the inscription to our catalog price of this monument, and send us the amount with your order. We will take all the risk of shaping, carving, tracing and engraving this beautiful monument to order for you, letter it exactly as you instruct us, ship it to you within ten weeks from the receipt of your order, permit you to examine it at your station, and if it is not found exactly as described and in every way perfectly satisfactory you may notify us and we will dispose of it at our loss and return your money, together with any freight charges you have paid. After you have placed it in your cemetery, we know you will write us that there is nothing to compare with it at anything like the wonderful prices we quote.

The weights are given opposite each price. Inquire among your neighbors and you will find many customers of ours who tell you of our responsibility and readiness to maintain our guarantee.

Art and Craft Hand in Hand Conceive and Create the Success We Here Present in Seven Sizes in Light Barre Granite at \$81.00 to \$385.00

Delivered on the Cars at the Quarry and Granite Works in Vermont.

The artist paused while modeling, stepped back to view his work so wonderfully unfolding and said, "Enough." To have completed the execution of this wonderful design on all four sides alike would have been beautiful, but to pause at this stage of his work was to conceive anew, and declare the thought would live imperishable; and so it lives.

The skilled artisan, with that grim determination born of constant geometrical precision and mechanical accuracy, cut, carved and shaped the imperishable rock, aiming to produce all four sides in equal harmony, until, the inspiration of the artist dawning, he stopped, and saw. Thus, this beautiful design remains fixed; an artist's inspiration, grasped at last by the skilled workman and presented to you in Light Barre Granite as the most artistic memorial ever offered you at anything like the prices of \$81.00 to \$385.00.

\$31.50 In Dark Barre Granite \$60.00

Delivered on the Cars at the Quarry and Granite Works in Vermont.

Beautifully polished and traced on the front, rock faced in the most artistic manner on the back, ends and top; rock faced on all four sides of the base with a beveled wash cut all around, just as illustrated, and if you desire it with a family name on the beveled edge base in raised letters we can furnish it as shown in illustration. To obtain the best results of our extremely low catalog prices, make your selection of this design exactly as we illustrate it, avoiding special changes which increase the cost.

Intrust us with your order, accompanying it with our catalog price, adding sufficient to cover any inscription you desire, calculating the proper amount to remit us for the inscription by referring to page 73, where we quote all styles and sizes of inscription letters. Remember, we take all the risk; selecting with the greatest care the blocks from Best Barre Granite, free from flaw or blemish of any kind; cut, carve, shape, polish and finish it exactly as illustrated, letter it exactly as you instruct us, box it carefully and guarantee its safe arrival at your home station. You can open it, examine it, compare it with any other monument of like style and size, and if you do not find it the highest of high grade material, finished exactly as we illustrate and describe it, lettered exactly as you have ordered it, you can notify us and we will dispose of the monument at our own loss, returning to you the amount you have remitted us, together with any freight charges you have paid. Bear in mind this means a total loss to us, since after it is lettered the monument has no value to us or anyone else excepting yourself. Yet we are willing and glad to take this risk of insuring you against the assertions or attacks of all competition and against the loss of even one cent, if you do not find that you have made a large saving and that every word we say is true.

You will find the freight charges will amount to next to nothing as compared with what you will save in price. The rate per 100 pounds to your state is very low, as shown on page 108, where we quote the freight rates to a few points.

We use only Best Barre Granite, employ only the most skilled granite craftsmen, who execute our work second to none in the world. The highly polished face of this monument is the natural color brought out in polishing by these workmen, and is not colored with any false material so common among some granite shops to hide defects which will afterward appear from weather exposure. We quote below the measurements, weights and prices of this handsome monument.

It can be handsomely lettered either in raised letters or in V sunk letters as desired. The bottom base contemplates Light Barre, to be in better contrast with the upper block or die.

A simple, attractive, inexpensive and yet elegant tombstone in the first size, and monument in the four larger sizes.

On page 73 we quote prices for carving letters in granite and will indeed be glad to have you furnish us with any inscription or inscriptions desired placed upon one of these monuments that we may calculate the cost and submit it to you, including with it what the freight would amount to to your home station.

On page 108 we name the railroad rates of freight to a few towns in your home state, enabling you to readily calculate the large saving we make you in granite monuments.

Let us have the opportunity and we will gladly make one of these monuments special to order for you, finishing it exactly as illustrated and described, lettering it exactly as you may instruct us and guaranteeing it to reach your home station free from mar, scratch or injury, or we will gladly return your money, only asking that you write us for shipping directions for its return to Vermont.

A Splendid Monument in Dark Barre Granite at \$27.00 and Upward

Delivered on the Cars at the Quarry and Granite Works in Vermont.

We will make one of these monuments to order for you, finishing it exactly as illustrated, engrave it with the inscription exactly as you instruct us, box it carefully and ship it to your home station with the distinct understanding that if it does not prove all and more than we claim for it, a large saving to you even after you pay the freight, you can hold the shipment subject to our disposal and our total loss and we will not only return the money you have remitted us, but will include the freight charges you have paid. This would mean a total loss to us, since it would be lettered for you and you alone, and could not be used for anyone else. Is not this sufficient evidence of our confidence and assurance that we will please you?

The freight will amount to next to nothing compared with what we will save you on this splendid monument. See page 108 where we name the freight rates to a few points in your home state.

See page 73 for extra cost for carving letters in granite.

\$18.00 For This Popular Low Roll Design

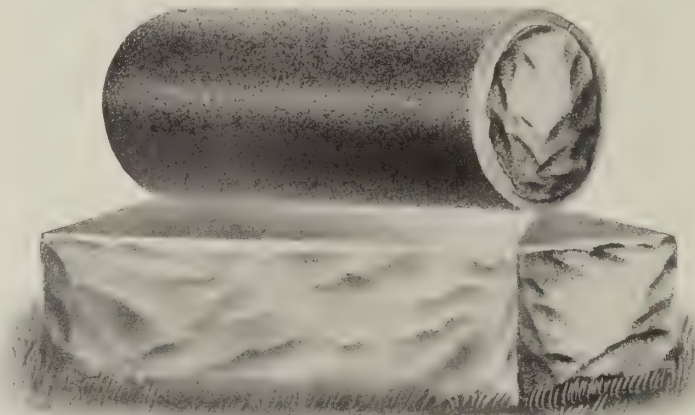

Carefully Boxed and Delivered on the Cars at the Quarry and Granite Works in Vermont.

With the highly polished roll ready for lettering, hammer margined rock face ends, broad wash cut or bevel on the base, and base rock faced on the four sides.

At \$18.00 and upward, delivered on board cars at the quarry and granite works in Vermont, this modern and popular low roll design is the greatest value ever offered by us or anyone else; cut from selected Dark Barre Granite, the roll polished to a high mirror finish, the ends tooled to a rock face surface, and resting on top of its large base it presents a most admirable grave marker or small monument.

The \$18.00 size has a base 22 inches long, 10 inches wide and 10 inches high, while the beautifully polished roll is 10 inches in diameter and 18 inches long. Vermont may seem a long distance from your home station, but the rate of freight on finished granite is very low, and you will find you can save nearly half the price charged by those who sell under the old time method of large profits, even after you pay the low rate of freight to your state, as quoted to a few points on page 108.

We do all the lettering for you, in any size and style letters known to granite workers, and our low price per letter is quoted on page 73.

We want your order, and to secure it we invite you to select one of these low roll designs. Send us the inscription exactly as you desire it, and if in doubt about the size letters required we will determine for you which size will look the best. Send us our catalog price, and enough to cover the inscription desired, and we guarantee to letter it exactly as you instruct us, box it carefully and put it on board the cars at the quarry in Vermont. When it arrives at your station you can examine it, and if you do not find it exactly as described, lettered exactly as you have ordered it, and equal in workmanship and quality of material to any granite memorial of like size you ever saw, if you are not thoroughly satisfied in every way, you can hold the shipment subject to our disposal and we will return your money, together with any freight you have paid.

Best Barre Granite Markers

BEST VALUES EVER OFFERED BY US OR ANY OTHER GRANITE DEALERS.

For those who desire grave markers separately from the family monument, or those ordering large family monuments and desiring to mark each individual grave, we call their attention to this and succeeding page. All of these markers can be furnished with a rough stub as illustrated on page 107, but we recommend that you order without the rough butt or stub extending below the ground, as it increases the weight and freight about three to four times. Set the marker on a concrete foundation made of crushed stone or gravel, slushed in with cement. This is superior to the rough butt and costs less. See page 108 for freight rates to your state, and page 73 for prices on granite letters.

The Best \$3.98 Worth of Barre Granite Marker

EVER OFFERED BY ANY PRODUCER OF GRANITE MEMORIALS.

At \$3.98 to \$7.50, according to size selected, delivered on the cars at the quarry and granite works in Barre, Vermont, we offer this popular granite grave marker with rock faced front, back and ends, with highly polished top surface, and the extra charge for the lettering selected will be as quoted on page 73. On markers of this size we recommend sunk letters as costing the least, and being furnished in any size from 2 inches upward, appropriate to the length and width of the top. No. 61D6800, having a polished top surface 6x12 inches, would be appropriately inscribed with 2-inch letters for a long name, and not over 3-inch letters for a short name; the other sizes in like proportion.

We recommend granite markers be ordered without the rough butt or stub extending below the ground. Our customers much prefer to save the freight, and set the marker on a concrete foundation made of crushed stone or gravel slushed in with cement.
